Please list players full handicaps as listed on their GHIN card. The tournament committee will adjust a team's handicap total by limiting the team members to a maximum of an 8-stroke difference between players. The adjustment is calculated from the lower handicap team member. Example: Player One's handicap index is 10.0 and Player Two's handicap is 24.3. Player Two's handicap is then adjusted to 18— a maximum of 8 strokes. Total team combined and adjusted handicap is then 28 (10 + 18).
